OUR VISION

We have designed and built EverETH with a vision to bring together a successful token based on Ethereum due to the original thriving success as it holds currently the second highest market value behind Bitcoin and has a huge future in the overall crypto market.

Our experienced team focused on offering investors a double return. Invest in EverETH, which after development will massively increase in value and gain in Ethereum which in the long run will dominate the crypto market. EverETH aims to create online spaces for members to socialize, buy, trade and invest in cryptocurrencies together while earning Ethereum

VALUES

EverETH's mission is to enrich, grow and empower our community to help them reach their goals and thrive within the crypto market. If you are new to crypto, you've picked the right place. The EverETH community is constantly growing and ripe with activity. With our dedicated team on several social media platforms, EverETH has limitless growth potential. Our team is experienced in every sector and together will make EverETH a success

ABSTRACT

"First-of-its-Kind" Rewards - Utility

EverETH was established on August 21, 2021, to generate passive revenue for the community. Simply holding EverETH in your wallet will earn you Ethereum. EverETH is an open-source, totally decentralized platform that has been entirely originated, driven, and developed by the community. With a total quantity of one quadrillion tokens and half of them burnt after launch, the current circulating supply is approximately 495 trillion tokens. The more EverETH you own, the more ETH you'll get. Investors will be paid in ETH for every transaction.

EverETH Dashboard

We have a state of the art earnings management dashboard where you can see details such as the total amount of ETH paid to the community, when the next reward payment will take place, etc.

EverETH Calculator

You have the ability to calculate your earnings based on the daily transaction volume. You have the power to edit the daily volume and number of tokens held to predict what your daily, weekly, monthly and annual earnings would be based on a particular set of values.

EverETH Swap

For the convenience of our community members, we offer a live decentralized swap directly on our website.

EverETH Wallet

One of the most exciting features from our roadmap, which is currently in the development phase.

EverETH NFT Marketplace

Our NFT marketplace will allow users to mint and buy/auction their own NFTs.

CORE VALUES

COMMUNITY

Community is everything and EverETH strives to include everyone from around the world. We have multiple telegram channels dedicated to our international communities and the community is growing day by day.

SECURITY

EverETH leverages a decentralized blockchain architecture which increases security and auditability, built on top of the Binance Smart Chain.

The automatic liquidity system helps create a stable price floor. Initial Liquidity Provided is locked with DXLock. The smart contract was successfully audited by TechRate, and is currently onboarding for Certik Audit with an additional 12 months of smart contract security monitoring by SkyNet.

LONGEVITY

The decentralized community aims for long term development of the ecosystem. We want EverETH to represent the foundation for real use cases, and greater rewards beyond any temporary trends.

Our experienced development and marketing teams will work tirelessly to ensure continued growth of the project.

www.evereth.net

Binance Smart Chain (BSC) was developed as a means of utilizing solidity-based smart contracts with much greater speed and efficiency than other, competing chains. With decentralized exchanges on BSC offering lightning-fast swaps and extremely low fees, BSC has started to become one of the most widely used blockchains for Decentralized Finance (Defi). BSC uses a token protocol developed by the Binance Team called BEP-20.

Advantages of the Binance smart chain are:

- It's a proprietary blockchain, which will provide security and safety to all users and developers.
- Its native dual chain interoperability will allow cross-chain communication and scaling of high-performance dApps that require a fast and smooth user experience.
- It's EVM-compatible and will support all of the existing Ethereum toolings along with faster and cheaper transactions.
- Its on-chain governance with Proof of Staked Authority consensus, built on 21 validators who validate the transactions, will provide decentralization and enable significant community involvement.

OFFICIAL SMART CONTRACT ADDRESS

TOKEN

Static-Reward

The contract employs a static reward system, 15% of every transaction is broken down as follows:

- 10% BEP20 Ethereum redistributed to holders
- 2% issued to fuel growth of the liquidity pool.
- 3% Ecosystem Development

Our superior auto-claim and ecosystem development is the driving force behind the project.

LOCKED

Liquidity-Infinite Lock

Providing holders with peace of mind that the token can always be exchanged. A trusted third-party provider, DXLock, will operate as middle man to ensure that all raised liquidity is locked in a secure locker for the set timeframe.

Eventually the Liquidity Pair will be transitioned to an infinite lock.

/EverETHOfficial

www.evereth.net

NON-RENOUNCEMENT OF OWNERSHIP

There is a common misconception that the Renouncement of Ownership is an essential portion to a solid project. While this may be true, there are also negative effects of this. With the renouncement of ownership, you lose the ability to get listed on certain exchanges as they require you to whitelist their address from the fees.

If we renounce ownership we essentially lose this ability. Another negative impact is the inability to change fees or fix any issue should it present itself in the future. While we understand that a lot of people like seeing that ownership has been renounced, we have not and will not renounce during our growth stage since it is an essential piece for that growth to take place in our roadmap.

EverETH

DEVELOPMENT

/EverETHOfficial

www.evereth.net

08

The EverETH protocol is masterfully designed to reward its holders with passive income through Ethereum rewards while ongoing utility development ensures lucrative long term return on investment (ROI).

10% Ethereum Rewards

10% of every buy/sell is taken and redistributed to all holders. Hold EverETH tokens and earn Ethereum. A Minimum of 200,000 tokens is required in order to receive rewards.

Our unique reward system is triggered by volume (buy + sell activity to cover gas fees). Payouts to holders may not occur every 60 minutes if the trading volume is low. When this is the case, the amount of rewarded Ethereum each holder will receive does not decrease.

However, will accrue over a longer period of time until it is suitable for a payout to trigger (usually between 1-2 hours).

Auto Pay

You don't need to claim your earned Ethereum. It's automatically sent to your wallet. If you choose to claim your rewards early you are welcome to do that through the EverETH Dashboard. Please understand that early claims require BNB for gas.

3% Ecosystem Development

The use of the Ecosystem wallet is designated to further develop the EverETH project as a whole. This encompasses but is not limited to marketing, sponsorships, personnel and operating costs.
